Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 6 – 8, 11, 12, 16, 17, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura et al. (US 5,168,296).

Nakamura et al. have a submerged processing device for a photosensitive material having a submerged processing chamber. In Fig. 3, rollers serve as the entrance and exit opening and closing members; the rollers 53a, deform to allow the material to pass through the convey path into the submerged processing chamber or process space 10 which acts as a storing portion. In Fig. 9, blades 215 serve as an entrance and exit opening and closing member and elastically deform to allow the material to enter the submerged processing chamber or space 206A which acts as a storing portion. The rollers 53a and blades 215 are parallel to each other in the vertical arrangement in each respective figure.

***Allowable Subject Matter***

4. Claims 9, 10 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 1 – 5 and 13 – 15 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose a submerged processing device for processing a photosensitive material as claimed and having a processing liquid changing mechanism.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hydo (US 6,652,168), Verlinden et al (US 6,071,020 and Devaney et al. (US 5,379,087) disclose a photosensitive material processing apparatus having a submerged processing chamber with means to permit or close access to the chamber.
